Plan the pondweed investigation: CORMMSS

Name _____ Date _____

Question: How does light intensity affect the rate of photosynthesis in pondweed?

Letter	Finish the sentence in your plan
C	**Change: what you change, and its values** I will change the _____ by moving the lamp to ___, ___, ___, ___ and ___ cm from the pondweed.
O	**Organism: keep the living thing the same** I will use the same _____ of pondweed, _____ cm long, at every distance.
R	**Repeat** I will repeat each distance ___ times and calculate a _____.
M1	**Measure what: the result you record** I will count the number of _____ released.
M2	**Measure how: how long, and when** I will count for ___ minute(s), after leaving the pondweed ___ minutes at each new distance.
S	**Same: variable + how you keep it the same** I will keep the _____ the same by _____. I will keep the _____ the same by _____.

Progress check. The lamp warms the water as it moves closer. Which letter does this break? How will you fix it?

_____
